

# **SEBASTIAN HARVESTING**

## **Sebastian Harvesting**

### **SOP: Contamination in Field**

If an area in the field is contaminated by oil, blood, broken glass, feces etc., report IMMEDIATELY to the supervisor and/or food safety representative.

The contaminated area will then be buffered accordingly to ensure the contamination does not increase in scope.

Buffered area will not be harvested.

The company and the grower will be notified.

The contamination will be removed by the grower.

## **Sebastian Harvesting**

### **SOP: Contamination on Product**

If product is contaminated by oil, blood, broken glass, feces, etc., report IMMEDIATELY to the supervisor.

All contaminated product will be properly disposed.

## **Sebastian Harvesting**

### **SOP: Contamination on Equipment**

If machine is contaminated by oil, blood, broken glass, feces, etc., machine must be stopped IMMEDIATELY!

Report the contamination to the supervisor.

Machine will then be cleaned.

Refer to washing equipment guidelines.

## **Sebastian Harvesting**

### **SOP: Contamination on Packaging Material**

If packaging material is contaminated by oil, blood, broken glass, etc., DO NOT USE!

Report the contamination to the supervisor.

The packaging material will then be properly marked with “Hold- Do Not Use”.

Report the occurrence to the company that shipped the material and return.
