

# SEBASTIAN HARVESTING

## **Sebastian Harvesting**

### **SOP: Water in storage tanks replaced and chlorinated daily**

Sebastian Harvesting Trailers 20A and 21A fill up with potable water using the City of Soledad's hydrant located at Vista de Soledad Street at the end of the day.

Trailers hauling storage tanks returned to Spring Mix yard where chlorine is added to the desired level of 60-200 PPM.

Tanks stored overnight at Spring Mix yard.

Water re-tested in the morning to ensure appropriate chlorine levels.

Harvest machines filled with water.

Tanks on machines hold 200 gallons of water. Each time the machine is filled, the water in storage tank is re-tested to ensure appropriate chlorine level of 60-200 PPM.

Tanks emptied daily.
